RANA ZEESHAN

AI Engineer | Generative AI | Agentic AI | Cloud & AI Applications

+92-3074132838 | zeeshanrana2014@gmail.com | Changa Manga, Tehsil Pattoki, Punjab, Pakistan

PROFESSIONAL SUMMARY

Computer Science professional with an MS in Computer Science and a practical focus on Artificial Intelligence, Generative AI, Agentic AI, and AI engineering. Experienced in developing AI-powered applications using Python, LLMs, RAG pipelines, local model inference, computer vision, and real-time voice AI. Strong working knowledge of LangChain, Ollama, LiveKit, OpenCV, YOLO, React.js, Next.js, REST APIs, Git/GitHub, Azure AI services, and AWS cloud fundamentals. Holds Microsoft Certified: Azure AI Apps and Agents Developer Associate and AWS Certified Solutions Architect – Associate certifications. Seeking an AI/Software Engineering opportunity with PSEB where I can contribute to practical digital products, cloud-enabled solutions, and Pakistan's technology ecosystem.

CORE TECHNICAL SKILLS

AI Engineering & GenAI: Agentic AI, Generative AI, LLM Applications, LangChain, RAG Architecture, Ollama, Prompt Engineering

Programming & Web: Python, OOP, JavaScript, Next.js, React.js, HTML5, CSS3, Tailwind CSS

Computer Vision: YOLO, Object Detection, OpenCV, Image Processing Pipelines

Voice & Conversational AI: LiveKit Real-Time Agents, Speech-to-Text (STT), Text-to-Speech (TTS), Audio Streaming

Cloud & Development: Azure AI Services, AWS Cloud Fundamentals, REST APIs, Git, GitHub, VS Code

SELECTED AI & SOFTWARE PROJECTS

Vision AI Object Detection System

Developed a real-time computer vision application using YOLO and OpenCV for image and video-stream processing. Implemented confidence filtering and multi-class detection to support reliable object recognition and optimized inference.

Local RAG Knowledge Chatbot

Built a privacy-focused knowledge chatbot using Ollama and LangChain. Implemented semantic vector retrieval for document-grounded responses, prompt optimization, and local LLM inference to reduce dependence on external model APIs.

Real-Time Voice AI Agent

Architected a real-time conversational voice agent integrating Speech-to-Text (STT), LLM reasoning, and Text-to-Speech (TTS). Used LiveKit room sessions for low-latency bidirectional audio streaming and responsive agent interactions.

PROFESSIONAL CERTIFICATIONS

Microsoft Certified: Azure AI Apps and Agents Developer Associate — Microsoft

AWS Certified Solutions Architect – Associate — Amazon Web Services

EDUCATION

MS – Computer Science | University of Okara, Okara | 2022 – 2024

MSc – Information Technology | University of Education Township, Lahore | 2020 – 2022

BSc – Computer Science | University of the Punjab, Lahore | 2017 – 2019

FSc – Pre-Engineering | Govt. Post Graduate College, Pattoki | 2015 – 2017

Matric – Science | Govt. Boys High School, Changa Manga | 2013 – 2015

LANGUAGES

English | Urdu | Punjabi | Korean

TARGET ROLES

AI Engineer | Generative AI Engineer | Software Engineer | AI Application Developer
